New certifier / notified body of the QM system according to ISO 13485 and the devices at Hilotherm

Dear Sir or Madam,

we are pleased to inform you that the QM-System acc. ISO 13485 from HILOTHERM has been certified by the TÜV Süd Product Service and will be regularly monitored in the future.

The change of the certified body from the previous SLG to the TÜV Süd was considered reasonable because of the international orientation and experience of TÜV.

The certification audit was successfully carried out by TÜV Süd on 17. and 18. January 2017 in our company.

For our class II devices, this will change the identification number of the notified body in the CE marking

The amended QM- certificates and declarations of conformity of the devices can be found in the appendix.

It should be mentioned that information material (brochures, flyers, etc.) with the following TÜV logo can be advertised.

The Hilotherm team will of course be happy to answer any questions you may have.

Best regards

A handwritten signature in blue ink, appearing to read 'K. Janßen', is written over the printed name.

K. Janßen
